*New for Spring*

Here's a great idea from *RedWing....* the **Cocoon**. They are great for photographing small reflective objects such as watches and jewellery or any product that requires evenly diffused lighting. The **Cocoon** virtually eliminates undesired reflections and gives you three ports to shoot from. Another great feature is that they can be assembled and disassembled in a matter of minutes. The **Cocoon** comes in two sizes and two prices:

RD1600 is 17w x 20h x 27l	\$242.50
RD1605 is 34w x 40h x 54l	\$566.50

Ken Product Sales

The Cocoon can be used with flash, hot lights, daylight or strobes. The Cocoon creates even highlights on even the most reflective of products, like the silver model car (left). Great for digital photography.

*Album & Folder Update*

Most manufacturers' price increases have now been received. If your studio needs a new package of Soft Goods price sheets, please let me know. A new set will be sent out as soon as possible.

Do you want, need, or yearn for non-stock items from any of our brochures? We can special order cases of these items for you (please confirm quantities and prices with me prior to ordering). Minimum lead time of approximately 15 working days is required.

## Rental News

### Canon D60 Digital Camera

Yes, I have one in rentals now. It's a 6 megapixel camera that uses Canon AF lenses. We have it in a kit with 2 CF cards, a USB card reader and all the cords and cables that go with it. It rents for \$150.00 a day.

### Canon ZR40 digital camcorder

It has an 18x optical zoom, and an analog to digital converter so you can turn your favorite VHS tapes into digital files, or make a movie and edit it in your computer. Find out more information on these Canon cameras at [www.canon.ca](http://www.canon.ca).

Not into digital?? We still have a full range of conventional equipment here for all the film users out there. Don't forget the May long weekend coming up, three days for the price of one!

## May 2002 - Digital News items

The new **Canon D60** Digital Camera is becoming more readily available finally. This camera has extraordinary image quality for its price (\$3500) and when I tested it in an ambient fluorescent light situation at ISO 1000, I was surprised at how clean the image looked. Getting a good looking 16x20 print from this camera should be a breeze. If you would like to test it out, we also rent the D60 (see above) and if you decide that this camera is for you, we'll even take one day of rental cost off the purchase price.

**Adobe Photoshop 7.0** has finally arrived. We have upgrades in stock, although they are going fast. If you are using Mac OS X, you need it - period. If you aren't, but use a digital camera regularly, you would want it as well since the new image browser feature is superb. If you do a lot of image retouching, the new healing brush and patch tool are fabulous and would make the upgrade worthwhile. Other changes are more subtle and if you don't fall into any of the above categories, the upgrade may not be as appealing. Of course, if you want the latest and greatest, by all means buy it! The upgrade is \$249. Call if you have questions about what has changed.

**Digital clearance items** • we are clearing out some old stock of scanners, software, memory cards and more. For details, call and ask for Mike.
