Album & Folder Updates

August

2002

News Flash!! DF's NEW Bone Leather cover (905W) has been released in the 5x7 size, and they are moving fast.

Have you seen the new TAP Folders/Group Mates for Sports Teams, Dance Schools, Cheerleaders & Gymnastics Clubs? I have samples for you to see and touch.

Just a reminder to Studios wanting or needing special-ordered items: we need a minimum of three weeks lead-time, depending on the manufacturer and their location.

This just in!! We have found a replacement for the discontinued Maestro black proof album. The TAP Concord is a 4x5 / 4x6 proof album that holds 210 prints and has a leather like finish. This multi-use proof book can be used for so much more than just weddings.

Digital News

Hot News! Price drop on the Canon S900 Photo Inkjet Printers, now \$499 !

Just in are the new Epson Stylus Photo 2200 printers. The 2200 is the successor to the Epson Stylus Photo 2000P and boy, has Epson ever made improvements! Here is a quick rundown of its major new features:

- Faster printing, up to 3x with included USB and Firewire interfaces.
- New "Ultrachrome" pigment inks with a much wider colour gamut. Wider even than some dye based inkjet printers but with a longevity rating of 80 years.
- Epson has essentially eliminated metamerism in the 2200. Metamerism is the tendency for a print to show differences in colour balance when viewed under different light sources. On the older Epson Photo 2000P for example, prints would have a strong cyan cast when viewed in daylight but would look totally neutral under tungsten light. Metamerism is usually a problem with pigment based printers - but not so with the 2200 !
- Individual ink cartridges... seven - count 'em - 7 separate ink cartridges! Six of the usual photo printer colours plus a light black as well. The light black improves the smoothness of black and white prints tremendously. Having separate ink cartridges should assure the average cost per print significantly.
- Included is a motorized paper cutter for roll printing, plus the Epson 2200 can accept extra heavy card stock (single sheets) by feeding through a special slot at the back of the printer which allows for a perfectly straight paper path.
- Even with all these improvements, the new 2200 is less expensive than the older 2000P. Epson Stylus Photo 2200 \$179
