### The Impossible Project

Fresh from the Impossible laboratories and production machines in Enschede, Impossible Project's newest instant film with Color Protection! No longer does one need to immediately shield photos as they're ejected. Available for all Polaroid 600 and SX 70 cameras. Coming soon for Spectra and 1200 cameras.

### Emulsion Lifts

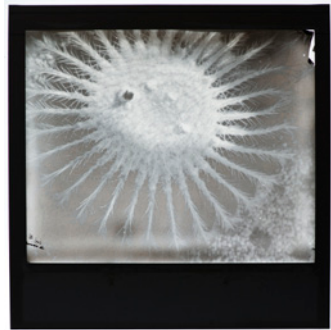

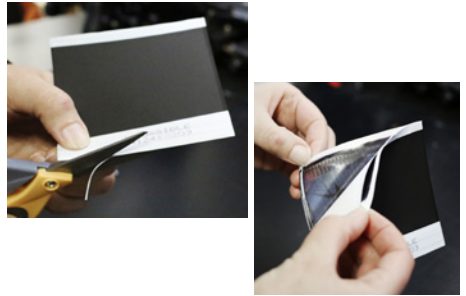

Discover the world of emulsion lifts using Impossible Project film. Beau has the Impossible Project tools you will need to make your own masterpieces - the Lift It Kit and the Creative Kit. We've found you can use a variety of papers, including canvases!

### Transparencies!

Impossible Project's film is versatile, and it is easy to transform it into a transparency, or even to layer transparencies! Making a transparency is as simple as taking an instant photo, waiting a few minutes then carefully cutting along the edge of the photograph and peeling the black backing off. For more details check out the Impossible Project website.

## RENTAL NEWS

### New in Rentals!

#### Canon 24-70mm f2.8L II

I have just received a pair of Canon's new 24-70mm f2.8L II lenses. This lens is noticeably improved over the old version in every way – sharper, higher contrast, you name it. It has a 9 bladed diaphragm for smooth bokeh, and is sharper corner to corner wide open. Come and try for yourself.

#### Nikon D600

Nikon's new addition to its full frame DSLR arsenal, this body is smaller and lighter than its brethren, but gives up nothing when it comes to image quality. Sure, the 24.3 megapixel sensor may not be the bee's knees like the 36.8 megapixel D800, but the D600 may have the edge on dynamic range, and with a smaller RAW file to boot! The D600 will feel very familiar for those who are used to the D7000, as the ergonomics are almost identical.
