Beau Newsletter - Boxing Week / January 2018

Deals on Cameras and Lenses • New Smith-Victor 19" Bi-Color LED Ring Light Has Arrived • Profoto Academy • Manfrotto and Pocket Wizard Sale • Camera Parkas for the Cold • Used Film Cameras Including a Classic Kodak Box Camera, Medium Format, and a Cambo 8x10 • more...

It's hard to believe that another year has gone by and 2018 is just around the corner.

We know you have many options for purchasing photographic gear and products, and we thank you for giving us that privilege.

The staff at Beau wish you all the best over the holidays! We hope you are able to enjoy some time with friends and family and we look forward to seeing you again soon.

Click the images to see what all the Beau Photo elves are up to during the holiday!

Reason for Giving

We hope that all of you got what you wanted for Christmas, and were able to spend time with the ones you love over the holidays. At this special time of year we might forget the less fortunate in our community and with the cold winter weather there is a greater need for the basic necessities of life.

To help out in a small way, Beau Photo is organizing a sock drive for the Men's Hostel in Vancouver. Bring in a new pair of socks between Dec. 27th and Jan 5th and we will deliver them to the hostel for you. In exchange we will give you a \$10.00 rental voucher to use towards your next rental at Beau. With your help, we can extend the season of giving a little bit longer for those in need locally.

Warm clothing is also needed for Men's Hostel: Do you have "like new" clothing you would also like to donate? (not old worn out or soiled clothes, or children's clothes.) Then bring it in at the same time. With the cold weather, warm clothing is needed: winter jackets (any size), underwear, belts, toques, gloves, scarves, sweaters (any size), work boots and runners (sizes 9 to 12), pants (sizes 34 and under), shirts (any size) and hoodies (any size). If you have any questions contact Ken at prosales@beauphoto.com or call 604 734-7771.

 XF 100-400mm f/4.5-5.6 - \$2,249 (SAVE \$250)

Here are the GFX medium format deals...

Buy a GFX-50S body and any lens to go with it (which you would of course need) and you will get between \$1,225 and \$1,300 off the bundle, plus a \$350 rental voucher! If you are buying just a body, for example if you already have a GFX and want a backup, it is not discounted, so that will still be \$8,125 although you'll still get a rental voucher. In terms of lenses, there are individual rebates, but they won't "stack" with body+lens bundle, which has a total of \$1,300 max discount. Here are the GFX lens rebates...

GF 23mm - \$2,549 (SAVE \$700)
 GF 32-64mm - \$2,299 (SAVE \$575)
 GF 45mm - \$1,750 (SAVE \$375)
 GF 63mm - \$1,499 (SAVE \$375)
 GF 110mm - \$2,799 (SAVE \$700)
 GF 120mm Macro - \$2,675 (SAVE \$700)

SONY

Sony has some great rebates as well, some substantially higher than before and, like all of our other camera bodies and lenses **during Boxing Week, you will get a rental voucher with any Sony body or lens purchase as well!** Deals as follows...

A6300 Body - \$999 (SAVE \$250)
 A6500 Body - \$1,549 (SAVE \$200)
 A7 Mark II Body - \$1,599 (SAVE \$300)
 A7S Mark II Body - \$3,199 (SAVE \$300)

A7R Mark II Body - \$2,999 (SAVE \$700)

Battery Grip for A7 Series (A7, A7S, A7R) - \$219 (SAVE \$130)

The following E-mount lenses are \$50 off, selling for...

Sony E 35mm f/1.8 OSS - \$529
 Sony E 50mm f/1.8 OSS - \$349

SAVE \$100 on these full-frame FE-mount lenses, currently on sale for...

Sony/Zeiss FE 16-35mm f/4 OSS - \$1,699
 Sony E 18-200mm f/3.5-6.3 OSS - \$949
 Sony FE 24-240mm f/3.5-6.3 OSS - \$1,299
 Sony/Zeiss FE 24-70mm f/4 OSS - \$1,399
 Sony/Zeiss FE 35mm f/1.4 - \$2,099
 Sony/Zeiss FE 35mm f/2.8 - \$899
 Sony/Zeiss FE 50mm f/1.4 - \$1,849
 Sony/Zeiss FE 55mm f/1.8 - \$1,149
 Sony FE 70-200mm f/4 OSS - \$1,699
 Sony FE 90mm f/2.8 OSS Macro - \$1,399

HASSELBLAD

We'll be continuing our special from before, so buy any H6D-50C or H6D-100C from us and receive a \$500 rental voucher. Buy an X1D-50C, and receive a \$350 rental voucher.

PRO SALES

KEN S.

Just Arrived at Beau Photo

We've just received the new Smith-Victor 19" Bi-Color LED Ring Light. I opened it up (sorry no YouTube video) and I can tell you I am very impressed with this ring light. It is not only powerful, the light quality is also

soft and wraps around the subject in a very pleasing way. It will make a great portrait light, and ideal for those in the fashion and makeup world.

The Smith-Victor 19" Bi-Color LED Ring Light features a high CRI of 95 with step-less color temperature buttons for tungsten to daylight adjustments. The reflector provides soft and smooth light. Luminance can be adjusted from 1% up to 100% and it has a rating of 6000 Lumens. The back of the light has a digital LCD screen allowing you quick and easy set up of your desired color temperature and brightness. As well, it comes with a tethered remote that provides control over the settings.

finally TetherTools has answered the call. TetherTools is introducing a complete line of high-speed USB-C compatible cables for either computer or camera users with USB-C ports. We are placing an order and will see them early January.

Keep your Camera Warm and Keep Shooting with At Frosted Lens Camera Covers!

As the days and nights are getting colder photographers are looking at ways to protect their cameras from the cold and the elements. You may not know this but Beau Photo

sells camera covers for the extreme cold. Designed and produced by a local company called At Frosted Lens, these camera "Parkas" are designed for outdoor photographers looking at protecting DSLRs and lenses from wind, humidity, frost or cold, and saving battery life. Specifically designed for use with a tripod, the camera parka is ideal for landscape photography such as long exposures, time-lapse, night and astro-photography. Whether the dew point is an issue, or in foggy or cold weather, the Camera Parka protects camera equipment and extends battery life (compared to an unprotected camera). Main features of the camera parka:

- Protection against humidity, moisture and frost
- Protection against wind chill
- Protection against cold
- Easy access to camera controls with long and wide side sleeves
- Quick access to camera LCD with a flap
- Magnets in the flap to secure it open or closed
- Easy manual focusing without removing the cover
- A pull string to secure the cover

- around the lens hood
- Pull strings on side sleeves to close tight when not in use
- Adjustable around tripod plate/head through opening and a Velcro strap
- A snap hook to tie the two side sleeves together
- Keep hands warm when changing settings
- Fits most DSLRs*

Two types of camera parka are available: Camera Parka Classic; and Camera Parka Pro. Both covers are made of high quality outdoor fabrics from Polartec®. The outer shell is water repellent, durable and blocks wind at 99%. It provides complete protection from wind, moisture and frost. The inner layer is a double fleece providing insulation from cold to the camera and warmth to the hands of the photographer when changing settings. The Camera Parka Pro has an extra layer of thermal fabric around the camera body. It helps keep the cold out and the heat in, when using chemical heat warmers for instance. Both covers have a version for short lenses or fish eye lenses. Extra pull strings inside the covers are used to secure the front sleeve around short lenses.

At Frosted Lens Classic Parka \$129.99

At Frosted Lens Classic Parka (Fisheye) \$139.99

At Frosted Lens Pro Parka \$149.99

At Frosted Lens Pro Parka (Fisheye) \$159.99

Learn Lighting with Profoto

Expand your knowledge with the Profoto Academy. Profoto has launched its own tailored online educational photography courses called the Profoto Academy. Light is the essence of every great image. For the last 50 years, Profoto has played a key role in enabling many of the world's most renowned photographers to create their iconic images through light. It seemed only natural then that Profoto should launch a series of photography courses with the focus on light and how to shape it creatively.

Profoto Academy is a series of online video courses designed to educate and inspire all of you who might be at the beginning of your journey with light and light shaping. It will provide you with the tools you need to grow and develop your craft – to help you take your image creation

to the next level.

Participants get to choose a course series from different fields of photography: fashion, portrait and wedding, and more courses to be added in the future. The Profoto Academy isn't just a series of online videos – it's a journey that concludes in Profoto certification. It works like this: as you watch, you also interact with the content through a series of quizzes related to what you have seen. At the end of the course, a photography assignment is set for the you to apply everything you've learned. Submit your image and receive personal feedback from a course instructor before finally becoming a "Certified Image Creator."

Ultimately, Profoto Academy is about playing a part in shaping the next generation of photographers, providing those who participate with the right tools, a comprehensive understanding of light and how to shape it, and the confidence to take their creativity to new heights. Learn more at profoto.com/academy

Profoto A1s Are Now Trickling In.

The demand for the new Profoto A1 is still very high and we are filling the pre-orders as soon as they come in. If you want to get your hands on either of the Canon or Nikon dedicated versions I highly suggest you place your order with a deposit sooner than later. This way you are assured to get a Profoto A1 as soon as they arrive.

Everyone who has tried one has been very impressed. Some of the many features people like include the fact that the A1 is extremely easy to use and its rear screen is easy to read and understand. People have found it very intuitive and there is no need to read a long instruction manual to understand how it works. A few people have commented on the price, but you have to remember that the Profoto AirTTL remote is also built in to the A1, and that is a \$600.00 value right there. With your A1, you can seamlessly connect to other Profoto flashes and control them easily.

One feature that will impress the wedding and event photographers is the A1 battery. The A1 comes with a built

in Li-Ion high-capacity battery that lasts up to four times longer than AA batteries with no performance fade, and has the ability to recharge quickly. The A1 flash also recycles four times faster than other on-camera flashes - 1.2s at full power. The Profoto A1 is not only an on-camera flash, it's also very effective off-camera, as a standalone unit. With the addition of an AirTTL Remote you now can control the A1 from your camera and have an effective, portable, and light-weight studio flash.

The Profoto A1 features:

- A round head with soft, smooth and natural fall off.
- AirTTL and HSS for a beautiful professional image fast.
- Smart magnetic click-on mount for A1 Light Shaping Tools.
- LED modeling light integrated to the head.

- Air Remote built-in.
- Rechargeable and exchangeable Li-Ion battery.
- 1.2 sec. recycling time.
- TTL/MAN switch.

Profoto Launches Air Remote TTL-F for Fujifilm Digital Cameras

Profoto has officially announced its newest remote: the AirTTL-F for Fuji Cameras. This long awaited remote is the collaboration between Profoto and Fujifilm to offer a seamless compatibility between Profoto flashes and Fujifilm cameras. The Profoto AirTTL was first announced in November 2013, making it possible to seamlessly merge Canon and Nikon cameras with Profoto AirTTL enabled flashes. Now Fujifilm shooters are included in the Profoto AirTTL family, empowering Fujifilm photographers to be more creative and focus less on settings.

The Profoto Air Remote TTL-F is a small, wireless radio transmitter that can be attached to the Fujifilm camera's hot shoe. The remote offers full TTL and HSS capability with Profoto's B1X, B1, B2, D2 and Pro-10 lights.

RENTAL NEWS

JASON K.

NEW in Rentals!

PocketWizard MultiMax II

We have just received a pair of the new PocketWizard MultiMax II units into the Rentals Department! An evolution of the original MultiMax transceivers, the II features sophisticated trigger time control functions and transceiver communication capabilities such as Infinite Intervalometer, SpeedCycler and Long Range Mode. Some new features on the MultiMax II are the 20 channels for ControlTL and Manual Power Control, which, if you have ControlTL compatible radios & flashes, you can control them in three zones in each group.

"The MultiMAX II is also Custom ID ready. Photographers can create incredible depth of field or stroboscopic effects with Multi-pop, give rear curtain sync to any camera, and even synchronize multiple cameras together," according to PocketWizard manager Patrick Clow.

\$25 for a set of two/day or weekend.

2018 Rental Bookings

Wow...it's going to be 2018 already! It's like I was just out shooting baby birds and bears in the spring and summer! Speaking of spring and summer, that time of year is peak wedding season, so all of you wedding shooters should reserve any cameras and lenses you would like to rent to avoid the last minute blues!

New Product! - MagMod Flash Modifiers

We've just brought in a great new line of flash modifier products by an innovative new company called MagMod. These new modifiers are universal to almost all hot shoe mounted flashes on the market and are quick and easy to use. The base of the system is the MagGrip, which is a flexible silicone band embedded with two high-powered magnets. Silicone retains its elasticity over very long periods of time and can withstand repeated use and being thrown around your camera bag or job site. Because it is stretchy, it makes this system very universal for almost

MagGrid + MagGel + 1/2 CTO Gel

all flash brands, which means you can buy one now and even if your camera system changes you won't need to buy a new modifier system. The magnets in the grip and all the accessories make changing modifiers extremely quick and painless. They are also super strong, so you know your modifiers aren't going anywhere and you can stack as many modifiers as you want. This system is so much easier to use than past systems that required velcro or other sticky adhesives.

They have also thought of everything in terms of various modifiers for this system. All are made of silicone to withstand heavy use. Here are a few of the different products available, plus some of the kits we will be stocking. There are more gel and mask options available too as special order items.

MagGrip - \$39.99 Silicone band that attaches to flash, contains two high-powered magnets. Acts as base of modifier system. Required for use of all MagMod modifiers.

MagSphere - \$79.99 Omni-directional flash diffuser. Creates a beautifully soft light with nice drop-off. Efficient diffusion that helps save battery life. Can be used in combination of

other modifiers, including the MagGel for colour correction. Requires MagGrip.

MagSnoot - \$79.99 Adjustable modifier great for directional lighting control. This snoot collapses down to 4 different levels, for a variety of lighting options. Very strong and

MagSnoot

versatile – made from one piece of flexible silicone rubber. Requires MagGrip.

MagMod Starter Flash Kit - \$159.99 Perfect kit to get you going with great flash photography. Includes MagGrip, MagSphere and MagGrid. MagGrid focuses the light to a precise 40 degree beam pattern, with minimal spill and hotspots. Can be stacked for an even tighter beam. Unlike many other grids, it is also made of the highly versatile silicone and therefore flexible and nearly impossible to break. MagGrid also available on its own currently as a special order item for \$59.99.

MagMod Basic Kit - \$139.99 Includes MagGrip, MagGrid, MagGel, Standard Gel Set and MagMod Transmitter Band. The MagGel allows you to use up to 3 gels at once, for colour correction or various colour effects.

The Standard Gel set includes 6 colour correction gels, one 3-stop neutral density gel and one opal frost diffusion gel. All gels are made of a rigid poly-carbonate to withstand the tests of time and use.

MagBeam Wildlife Kit - \$119.99

This kit helps extend the range of your flash 2 to 3 stops with the use of the MagBeam and Tele Lens insert. The MagBeam also has 3 levels of extension to create a spotlight like effect at its most extended. Includes MagGrip, MagBeam and Tele Lens.

These products are also available as special order items:

MagBounce - \$79.99 Bounce modifier that is made of durable silicone, designed for the softest light with the highest output. Requires MagGrip. Special order only.

MagGrid - \$59.99 Focuses the light from your flash to a precise 40 degree beam pattern, with minimal hotspots. Can be stacked for an even tighter beam. Special order only.

MagGel - \$39.99 Silicone holder for the MagMod poly-carbonate coloured filters. Can hold up to 3 gels. Requires MagGrip. Special order only.

Gel Kits - There are also a number of different gel packs for creative colour effects or colour correction.

Each contain 8 different gels for \$49.99 per pack. Requires MagGrip and MagGel. Special order only.

MagMask - "Gobo" style inserts for use with the MagBeam that projects various patterns. There are several packs containing 4 masks each for \$59.99. Requires MagGrip and MagBeam. Special order only.

FILM / ANALOGUE

New Year, New-to-You Camera!

Start 2018 with 1977, try the Pentax ME !

While quantities last, Beau Photo is having a Pentax ME super sale! All Pentax ME cameras fitted with a 50mm lens are on special for \$50, and any body only Pentax ME is just \$25!

The Pentax ME is mainly an automatic camera, though it also has an aperture priority mode which I prefer. However, if your desperate to use it manually, you can set it on Bulb mode or manual at 1/125 shutter speed. It is a small camera and extremely easy to bring everywhere. The ME uses K-mount lenses, which is very convenient as all Pentax cameras are K-mount compatible. Even the newest digital camera will work with the oldest K-mount lens.

Our Point & Shoot Sale will extend into January 2018!

New models are being released each week until stock runs

low. Name brands such as Canon, Pentax, Nikon, Fuji, Minolta and more are all listed at \$17.00 each.

Count the ways to spend your Christmas money on your friends and family.....or yourself LOL!

Here are some great ideas:

❖ Nothing says 'I love you' like a **medium format camera!**

Beau Photo now has quite the selection: Yashica D TLR, Rollei V TLR, various models of Mamiya 645, a Mamiya RZ67, a selection of Mamiya Press Cameras, Hasselblads and others.

❖ Cutest useful camera in the store right now- the Anniversary Kodak Camera! This one is a special edition

No 2 Hawkeye Model C. This camera was released on the 50th anniversary of Kodak. It came in a brown reptile skin texture with a gold coloured decorative seal on its side (the seal on this one appears silver due to age). Back in the 30s Kodak was trying to get kids interested in photography and decided that in celebration of their anniversary they'd give out one of these cameras to every child who was 12 years old in 1930. The best part is it takes 120 film! So no re-spooling or modifying is needed, just load 'er up and shoot! \$70.00
